Providing
Canadian Made
products to our
Valued Customers

Since the onset of the Global Pandemic of COVID19, it has become increasingly important as a nation, as a business, and as a consumer – to source and support locally made and manufactured products. When COVID19 hit, supply chain went through huge interruptions for products that many Canadian businesses need to continue providing essential services. Finding and sourcing supply overseas not only became difficult, it also came with price increases and heavy shipping duties to get the products here.

Being in the business of selling products to the Automotive, Metal, Cargo and Construction industries, many of the suppliers of our products come from all over the world. As a trusted vendor to many essential Canadian businesses, it became crucial to lean on our home-grown relationships with Canadian suppliers, as well as source new products that fulfill the needs of our customers from within our own borders. Although we already sell many wonderful Canadian made products, our 'new normal' has allowed Wurth Canada to form new relationships with more local suppliers providing Canadian made goods to our valued customers.

In this guide, you will find Canadian made products ranging from some of our chemical products, to abrasives, PPE and more. Please feel free to reference this guide and use it to shop smart, support local and feel safe in your quality Wurth product choices.

When you see this logo in any of our brochures or online, you can rest easy knowing this product was 100% Made in Canada.
